DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 7-11 and 19-26 directed to a display device non-elected without traverse. Accordingly, claims 7-11 and 19-26 have been cancelled.
2. Claims 1, 3-6 and 12-18 allowable. The restriction requirement, as set forth in the Office action mailed on 5/20/05, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 4, 5, 15, 16 and 18 directed to a display device no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

1. Claims 1, 3-6 and 12-18 allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or disclose in light of the specifications, 1) a circuit device comprising a first, second and third plurality of electrode terminals, each plurality of electrode terminals being linearly aligned in a plurality of columns along a first direction parallel to an edge line of a semiconductor substrate and linearly aligned in a plurality of rows along a second direction perpendicular to the first direction; 12) a display device comprising a drive IC having a first, second and third plurality of electrode terminals, each plurality of electrode terminals being linearly aligned in a plurality of columns along a first direction parallel to an edge line of a semiconductor substrate and linearly aligned in a plurality of rows along a second direction perpendicular to the first direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
